ROCKETSHIP RODENTS #1

"SEX DRIVE"

"RSR: Sex Drive" Written by Trejaan Illustrated by WerePuppy Based on a story idea by Kurst

IN THE ENGINE ROOM OF THE "FLAMING STINGRAY", DR WYLEN TS'RUK INSPECTS HIS EXPERIMENTAL ENGINE: YEAGER INDUSTRIES FEEDER FUSION EXTRALIGHT REACTOR, OR...Y.I.F.F.E.R.

How's it going, Doctor? Have you traced the malfunction?

Hey Cute Yote!

I believe so, Capt'n Pulsar!

Just a minor mis-alignment-- should have it corrected shortly!

So, you'll be ready for tomorrow's engine test?

Thanks to your engineer! He's a real wonder--wish we had him on-staff back at the lab!

You bet he is!

P-r-r-r-r-r-r-r-r!

Yeah, Nova's a miracle-worker, alright!

I'm looking forward to seeing what you can make this old girl do! If this modification makes her as fast as you say...

This design will change rocket-powered space travel as we know it! Once we get the housing remounted...

...There shouldn't be any more problems!

Heh heh...well, no one has more experience when it comes to "mounting" an engine than this little Furrit!

Keep us apprised, Doctor! And don't forget the Yiffblitz game in the rec room later.

I want to thank you for letting us tag along on this shake-down cruise, Dash!

Hey, there's always a place for Major Dick Action aboard this ship!

Tee hee!

And it's good that you brought your Li B. Do along, Major!

I warned ya--these guys play fer blood!

Don't you listen to him, Sweetness, I'm just lucky with cards.

More like: he's just really good at getting other guys naked!

It's a gift.

Listen, Doctor...I'd like to know a little more about how this experimental engine of yours works, if you don't mind...

I mean, how can it boost the ship's speed so dramatically? It doesn't seem to improve the thrust vector at all.

You're right, Captain...

It has nothing to do with thrust at all! The new enguine...creates an energy field that...well..."reduces" the ship's mass.

Ah...so, with less mass to push, the same amount of thrust...

...Makes the ship go faster! Ahhhh, crap.

Are zere any zide effects azzociated mit zis field?

Nothing has shown up in any of the simulations, but that's part of what this trial run is for.

The field is operational now and will continue to build in strength until tomorrow's test... but let me know if you start feeling anything odd.

BA AX

POWER

Let me know how it feels.

Uh...feels nice.

You haven't felt anything yet!

Professor Chronofur! And Patch, you're long-time/space companion!
None other!
EJACULATE!
I'm glad to see our show has such a...BIG audience!

Later...

Are you going to relieve Nova on the bridge?

Yeah--let me just put Randy here to bed and I'll head up there.

Goodnight you two-- SCHWEET dreams!

Better not tonight, love. Big day tomorrow. You'll need SOME sleep.

Are you...uh, sure I can't persuade you to join me, Cass?

Then can I...uh, ask you something?

You can ask me ANYTHING!

Could I have my clothes back?

Uh-uh! I won 'em fair and square!

G'night Li, dear!

Uh...g'night.

'Night Major. Heh heh!

sigh

I thought I put you to bed.

Is that how I got there? Anyway, that was hours ago-- it's my watch!

Well, make sure we don't get boarded by Emperor Mink's Spunktroops...

Or eaten by space dragons.

G'night Junior.

OK, and if the Piraptors show up, I'll kick their butts!

Heh

Avast, maties! Tie th' scurvey mammal t' the mast!

Orion Steelclaw! What do you want with my ship?

Aargh.

Ship? 'Tis not yer ship I wants, laddie.

I want YOU!

Well, why didn't you say so?

Oooooh!

Aaaarrghh!!

Now little vermin!
I finally have you in my grasp!
Hmph!

Keep your claws off me! (Unless you mean it...)

I will!

Who's going to stop me?

Hi Love! Let's get you out of this fiendish contraption!

Not so fast, dear... OOOh! Press that red button! I LIKE that one!

Heh heh!

Ow!

Ooh! Cass...I was having a wild dream!

About me, I hope...

Naturally.

Thank you.

For what? This?

No silly.

I wouldn't have minded if you had wanted to join the good Major.

I know. but I wanted to be with you.

THAT's what for.

There's no one I'd rather be with than you, Cass.

Good--'cause I'm so horny it'd kill a Furrit!

Me too! Have you noticed that everyone seems unusually yiffy?

Even for THIS crew.

Maybe we should ask the Doc about it...uh--tomorrow.

After all, it's not polite to talk with your...

...mouth full...oohhh.

Field strength is at maximum. You may procede when ready!

Ok, Buck--let's take it slowly. Engage the field and ahead one eigth!

Field engaged, one eigth thrust!

Field looks stable! Yes, yes, YES!!

Increase speed to one quarter!

Aye aye, Cap'n.

I'm picking up some odd readings. Doc--can you confirm?

Hmmm...

We're getting some odd field harmonics.

Should we abort?

[illegible] appears to [illegible] danger...

Let's take it to one half!

You heard the man, Buck.

Whatever you say, Boss.

Capt'n--speed is showing...HOLY! We're going 25% FASTER than normal!

Hear that, Doc?

I did indeed!

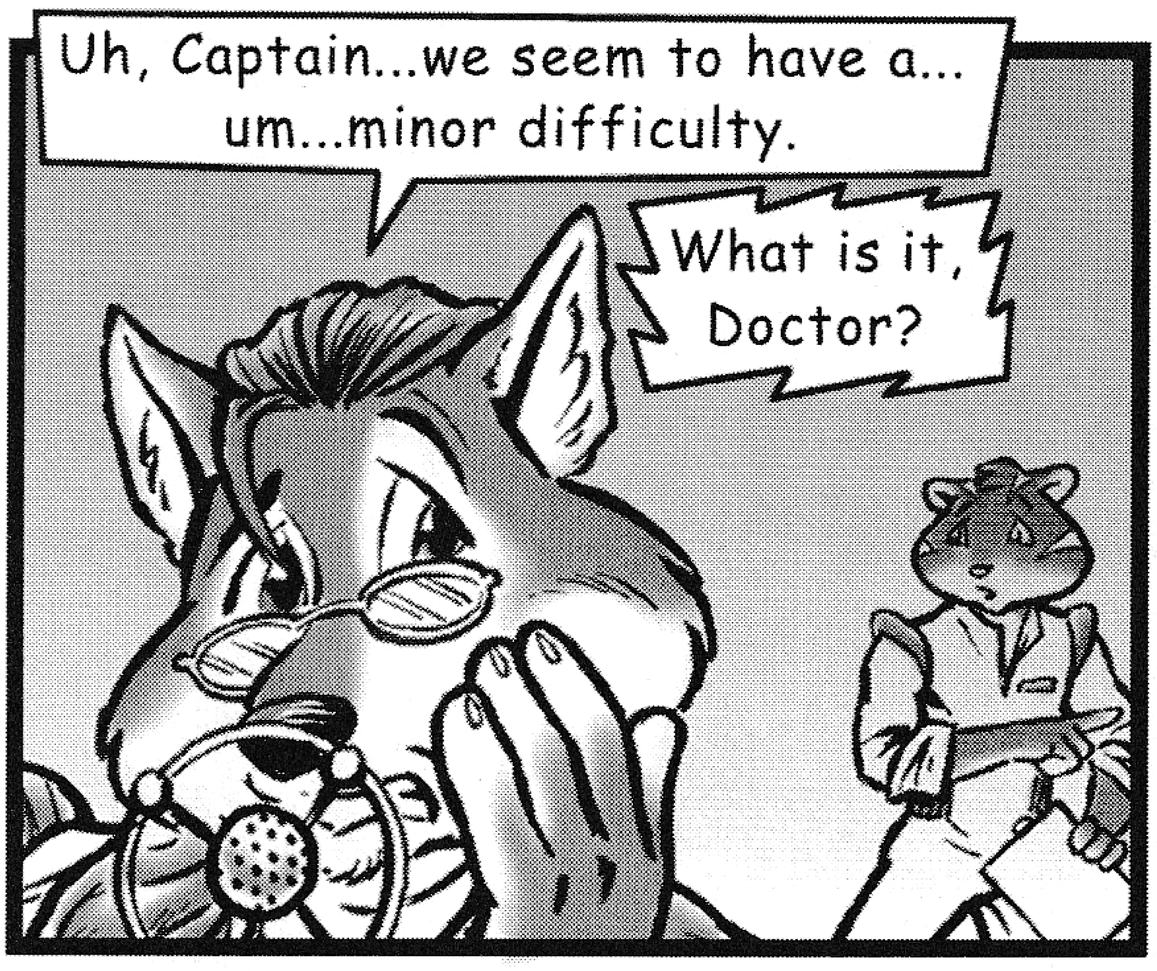

Music to our ears!

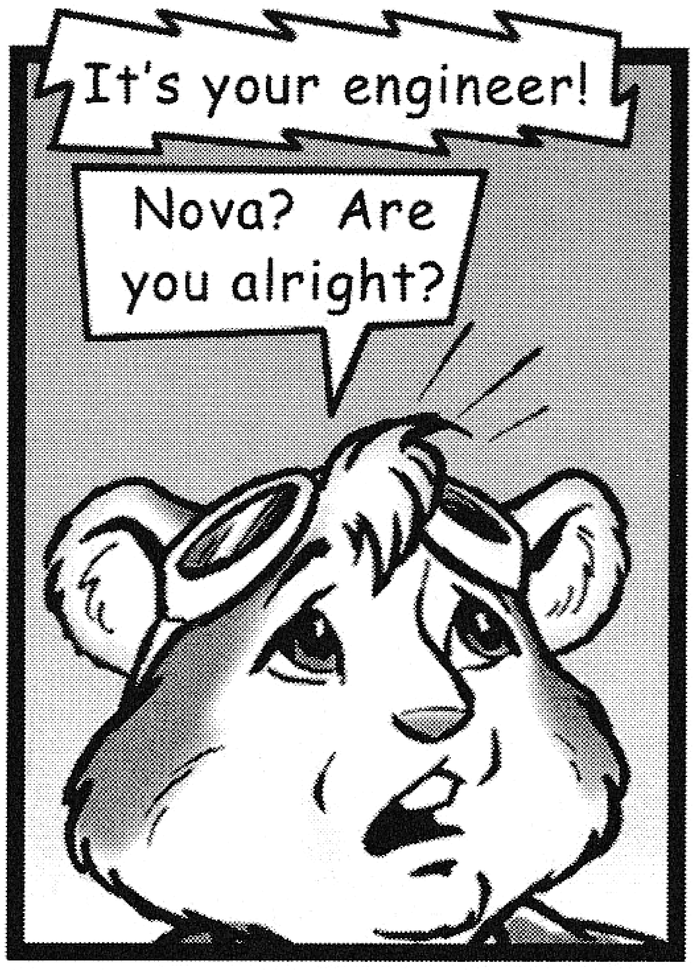

Eep!

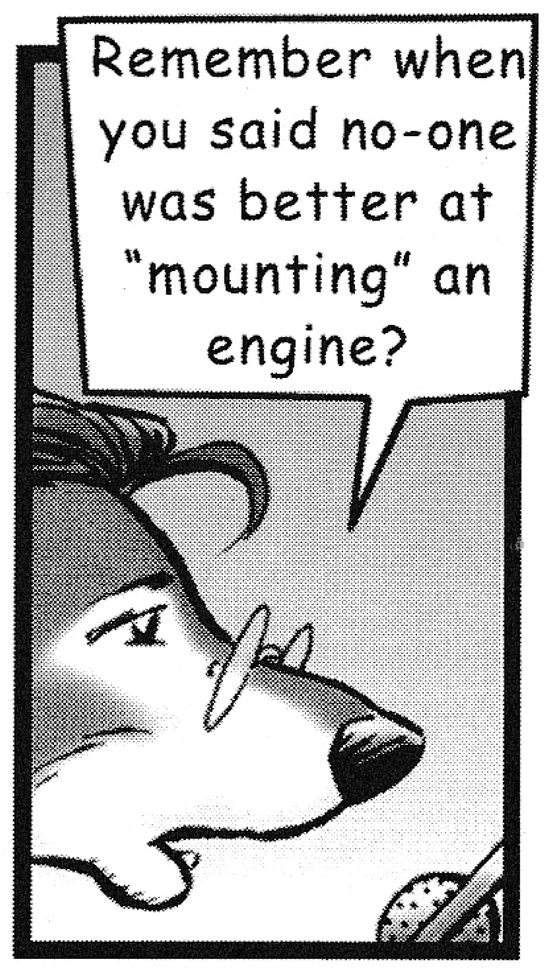

Zis iz odd...I recognize this wave pattern, but I cannot plaze it!

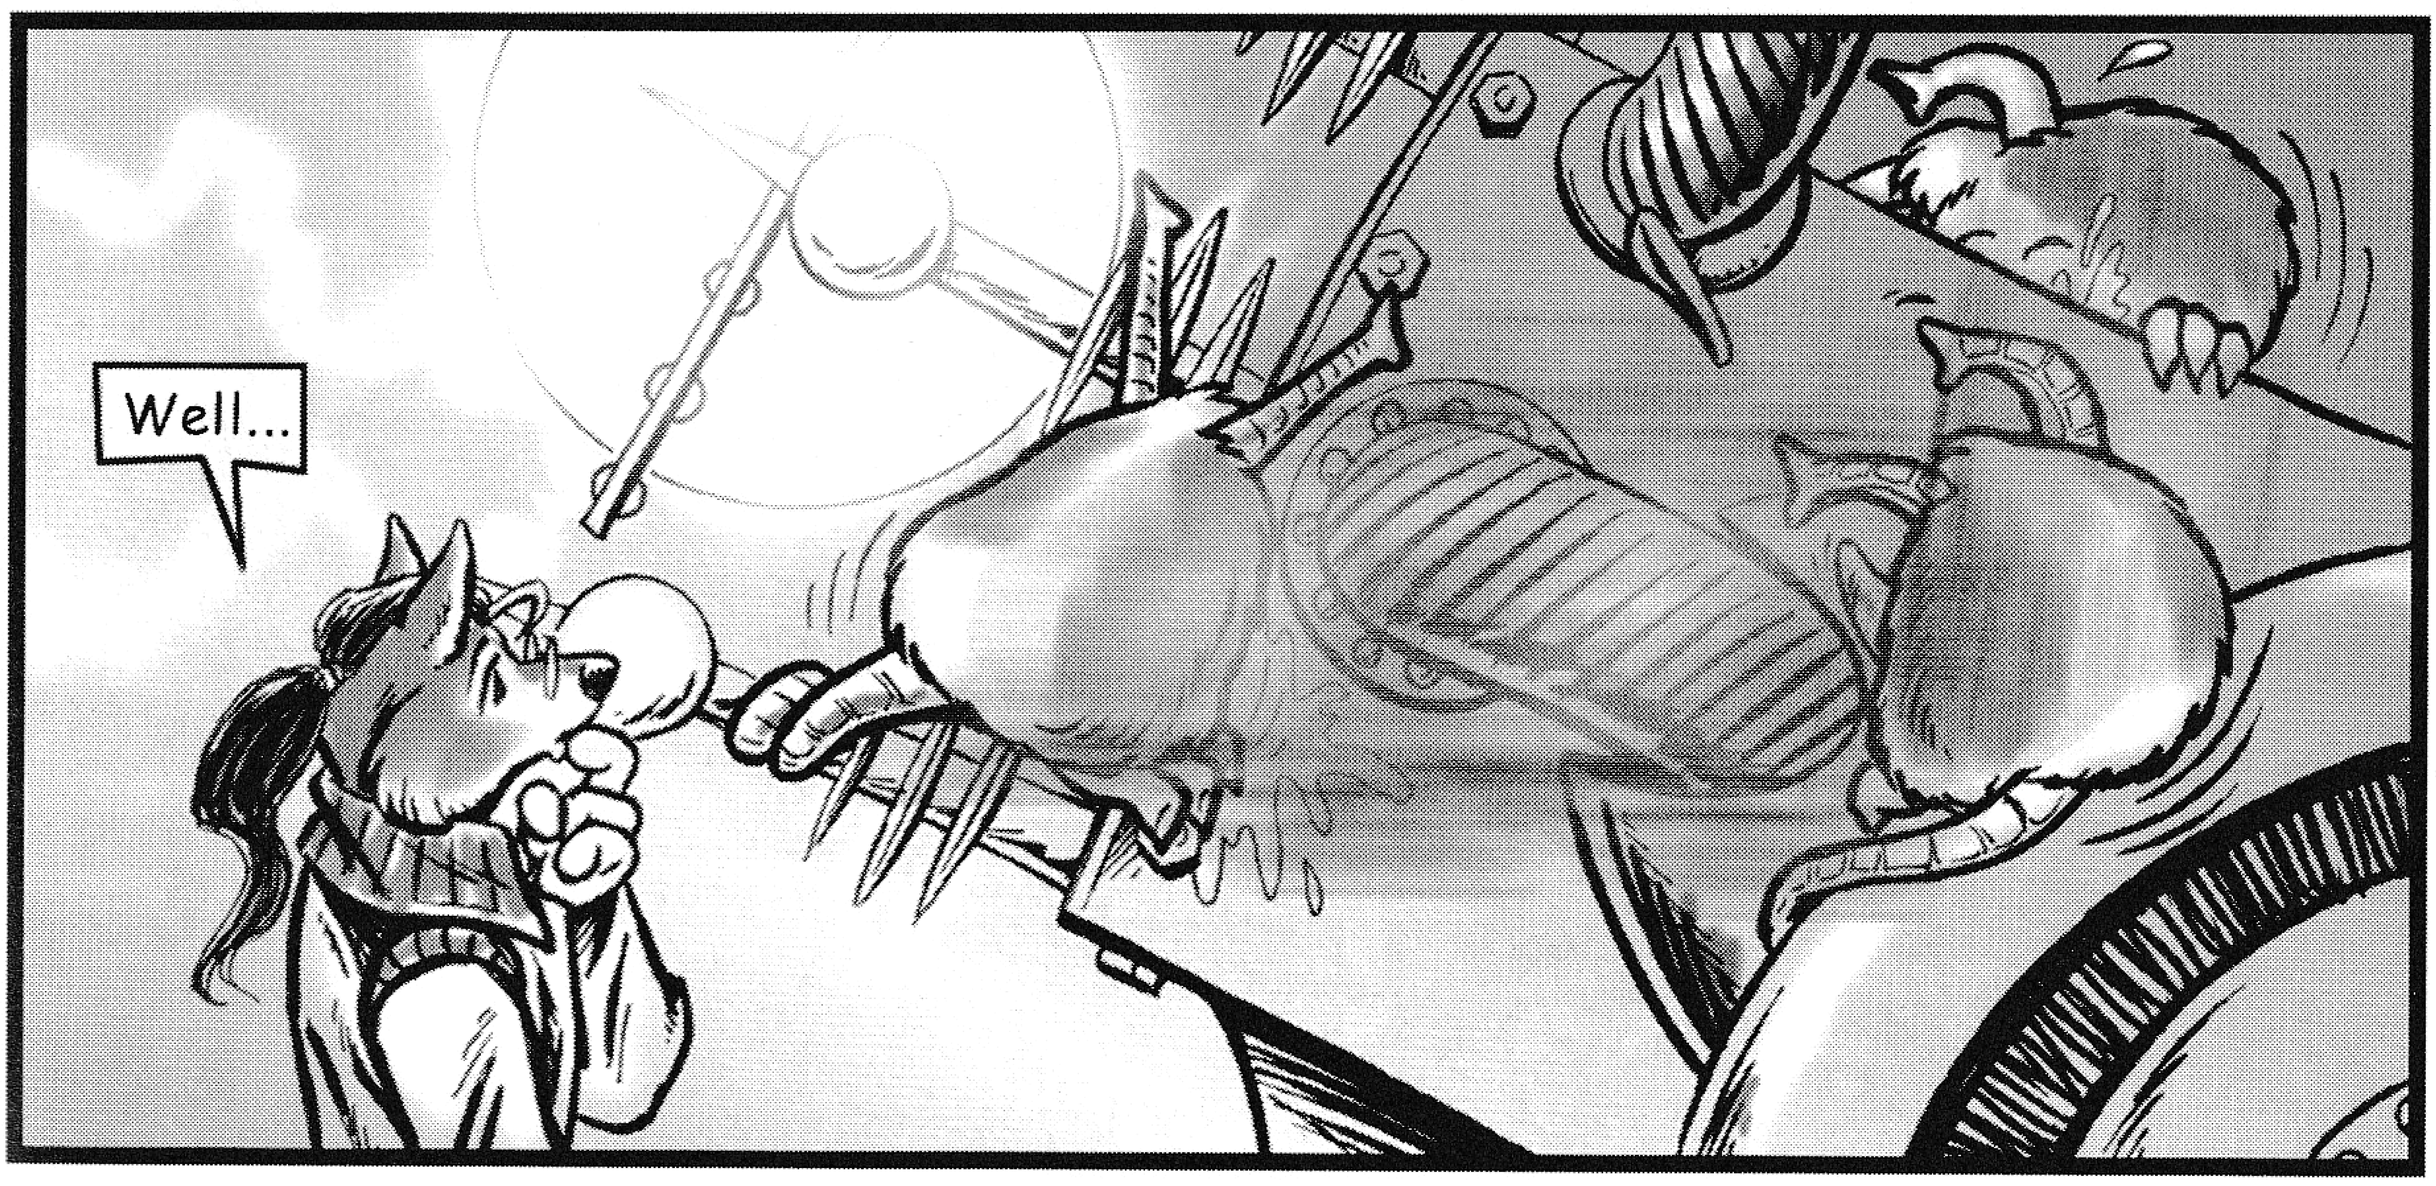

We're now at three quarters!

Uh...great...

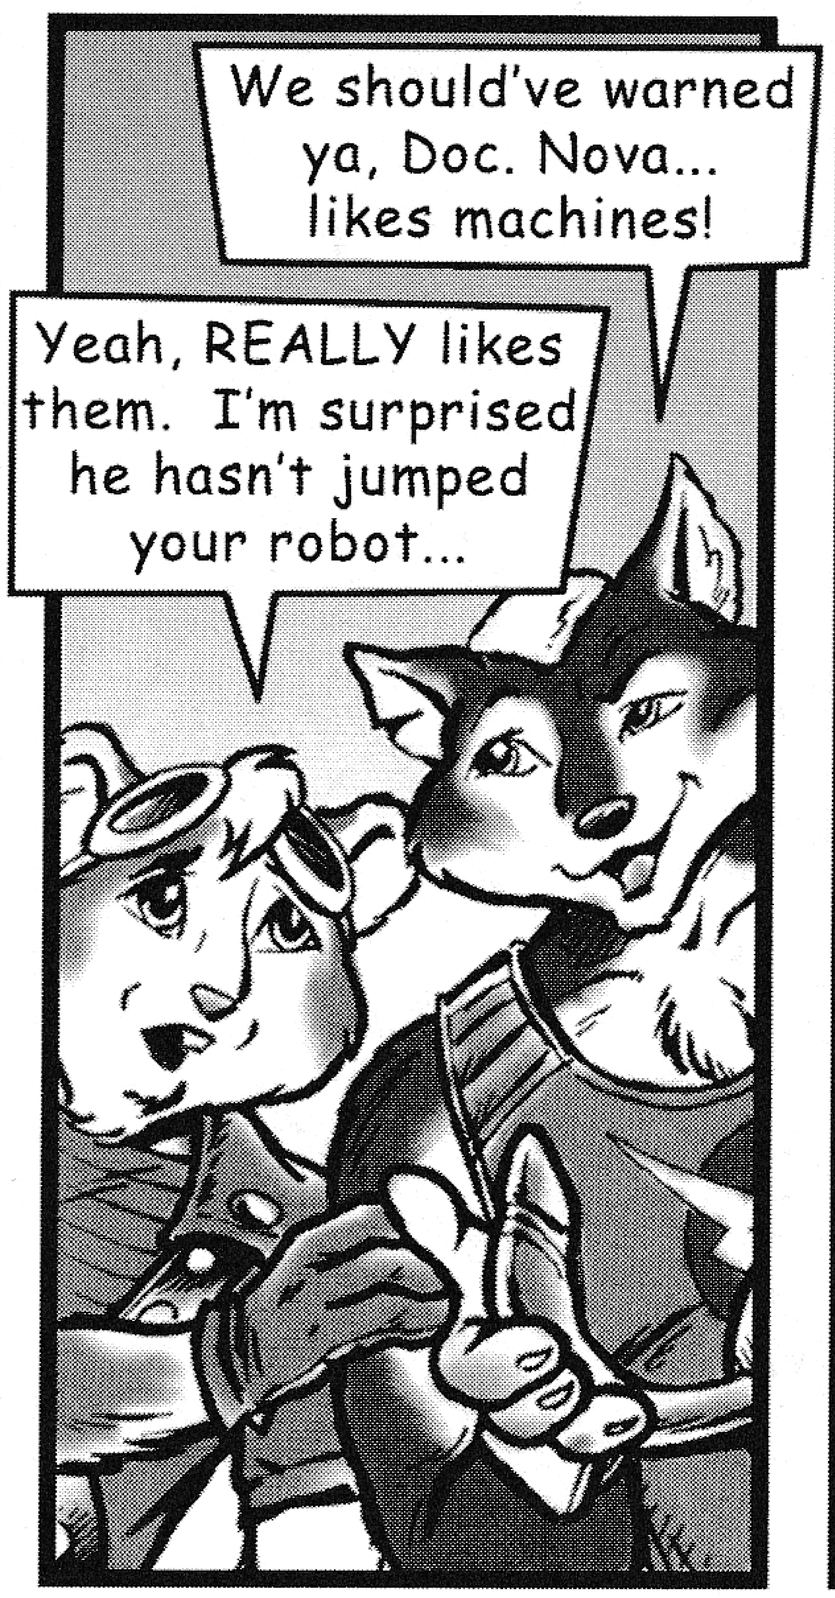

Uh, Captain...we seem to have a... um...minor difficulty.
What is it, Doctor?

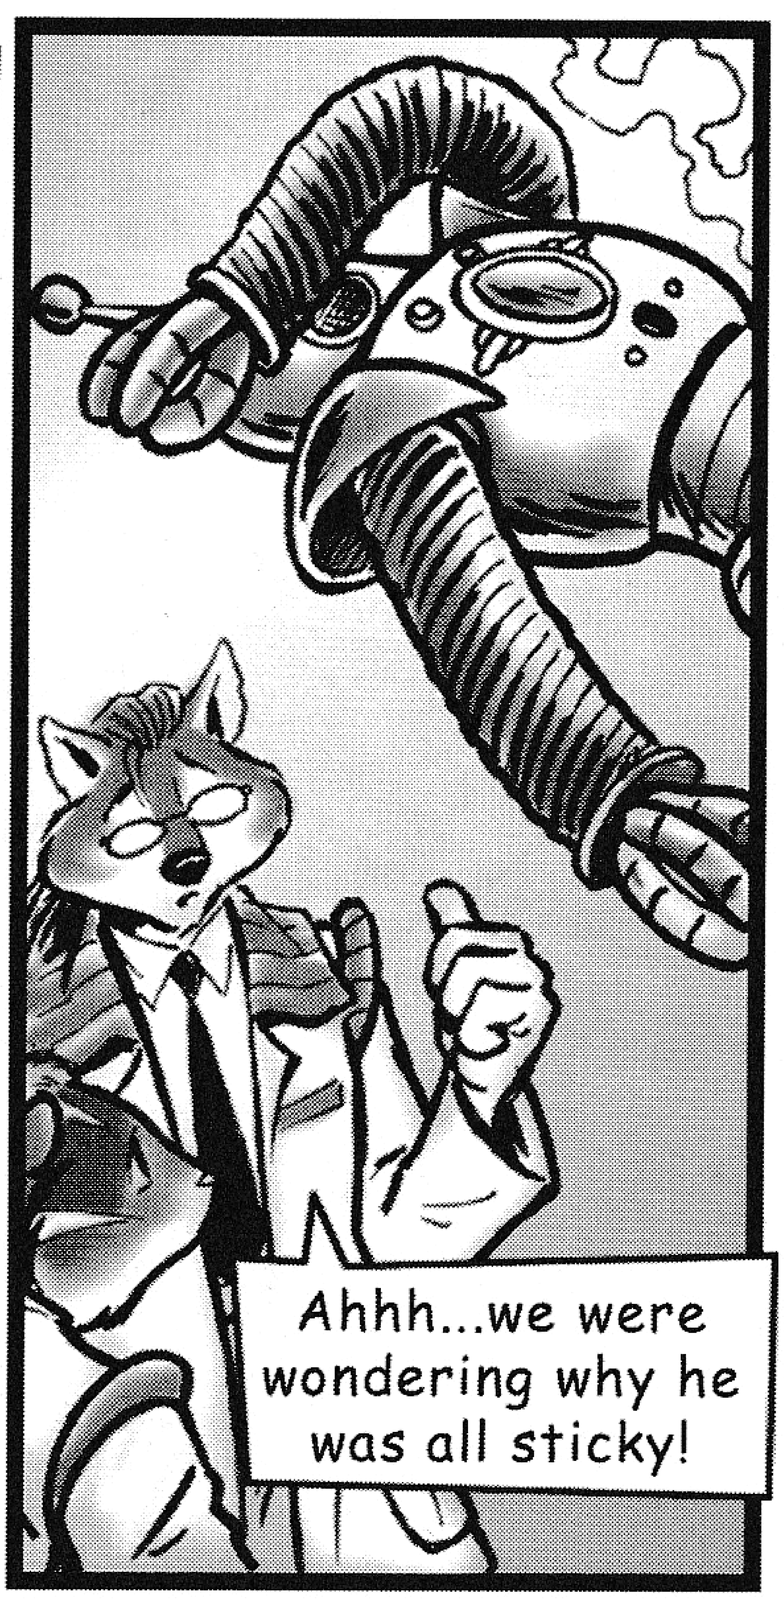

It's your engineer!
Nova? Are you alright?

Remember when you said no-one was better at "mounting" an engine?

Well...

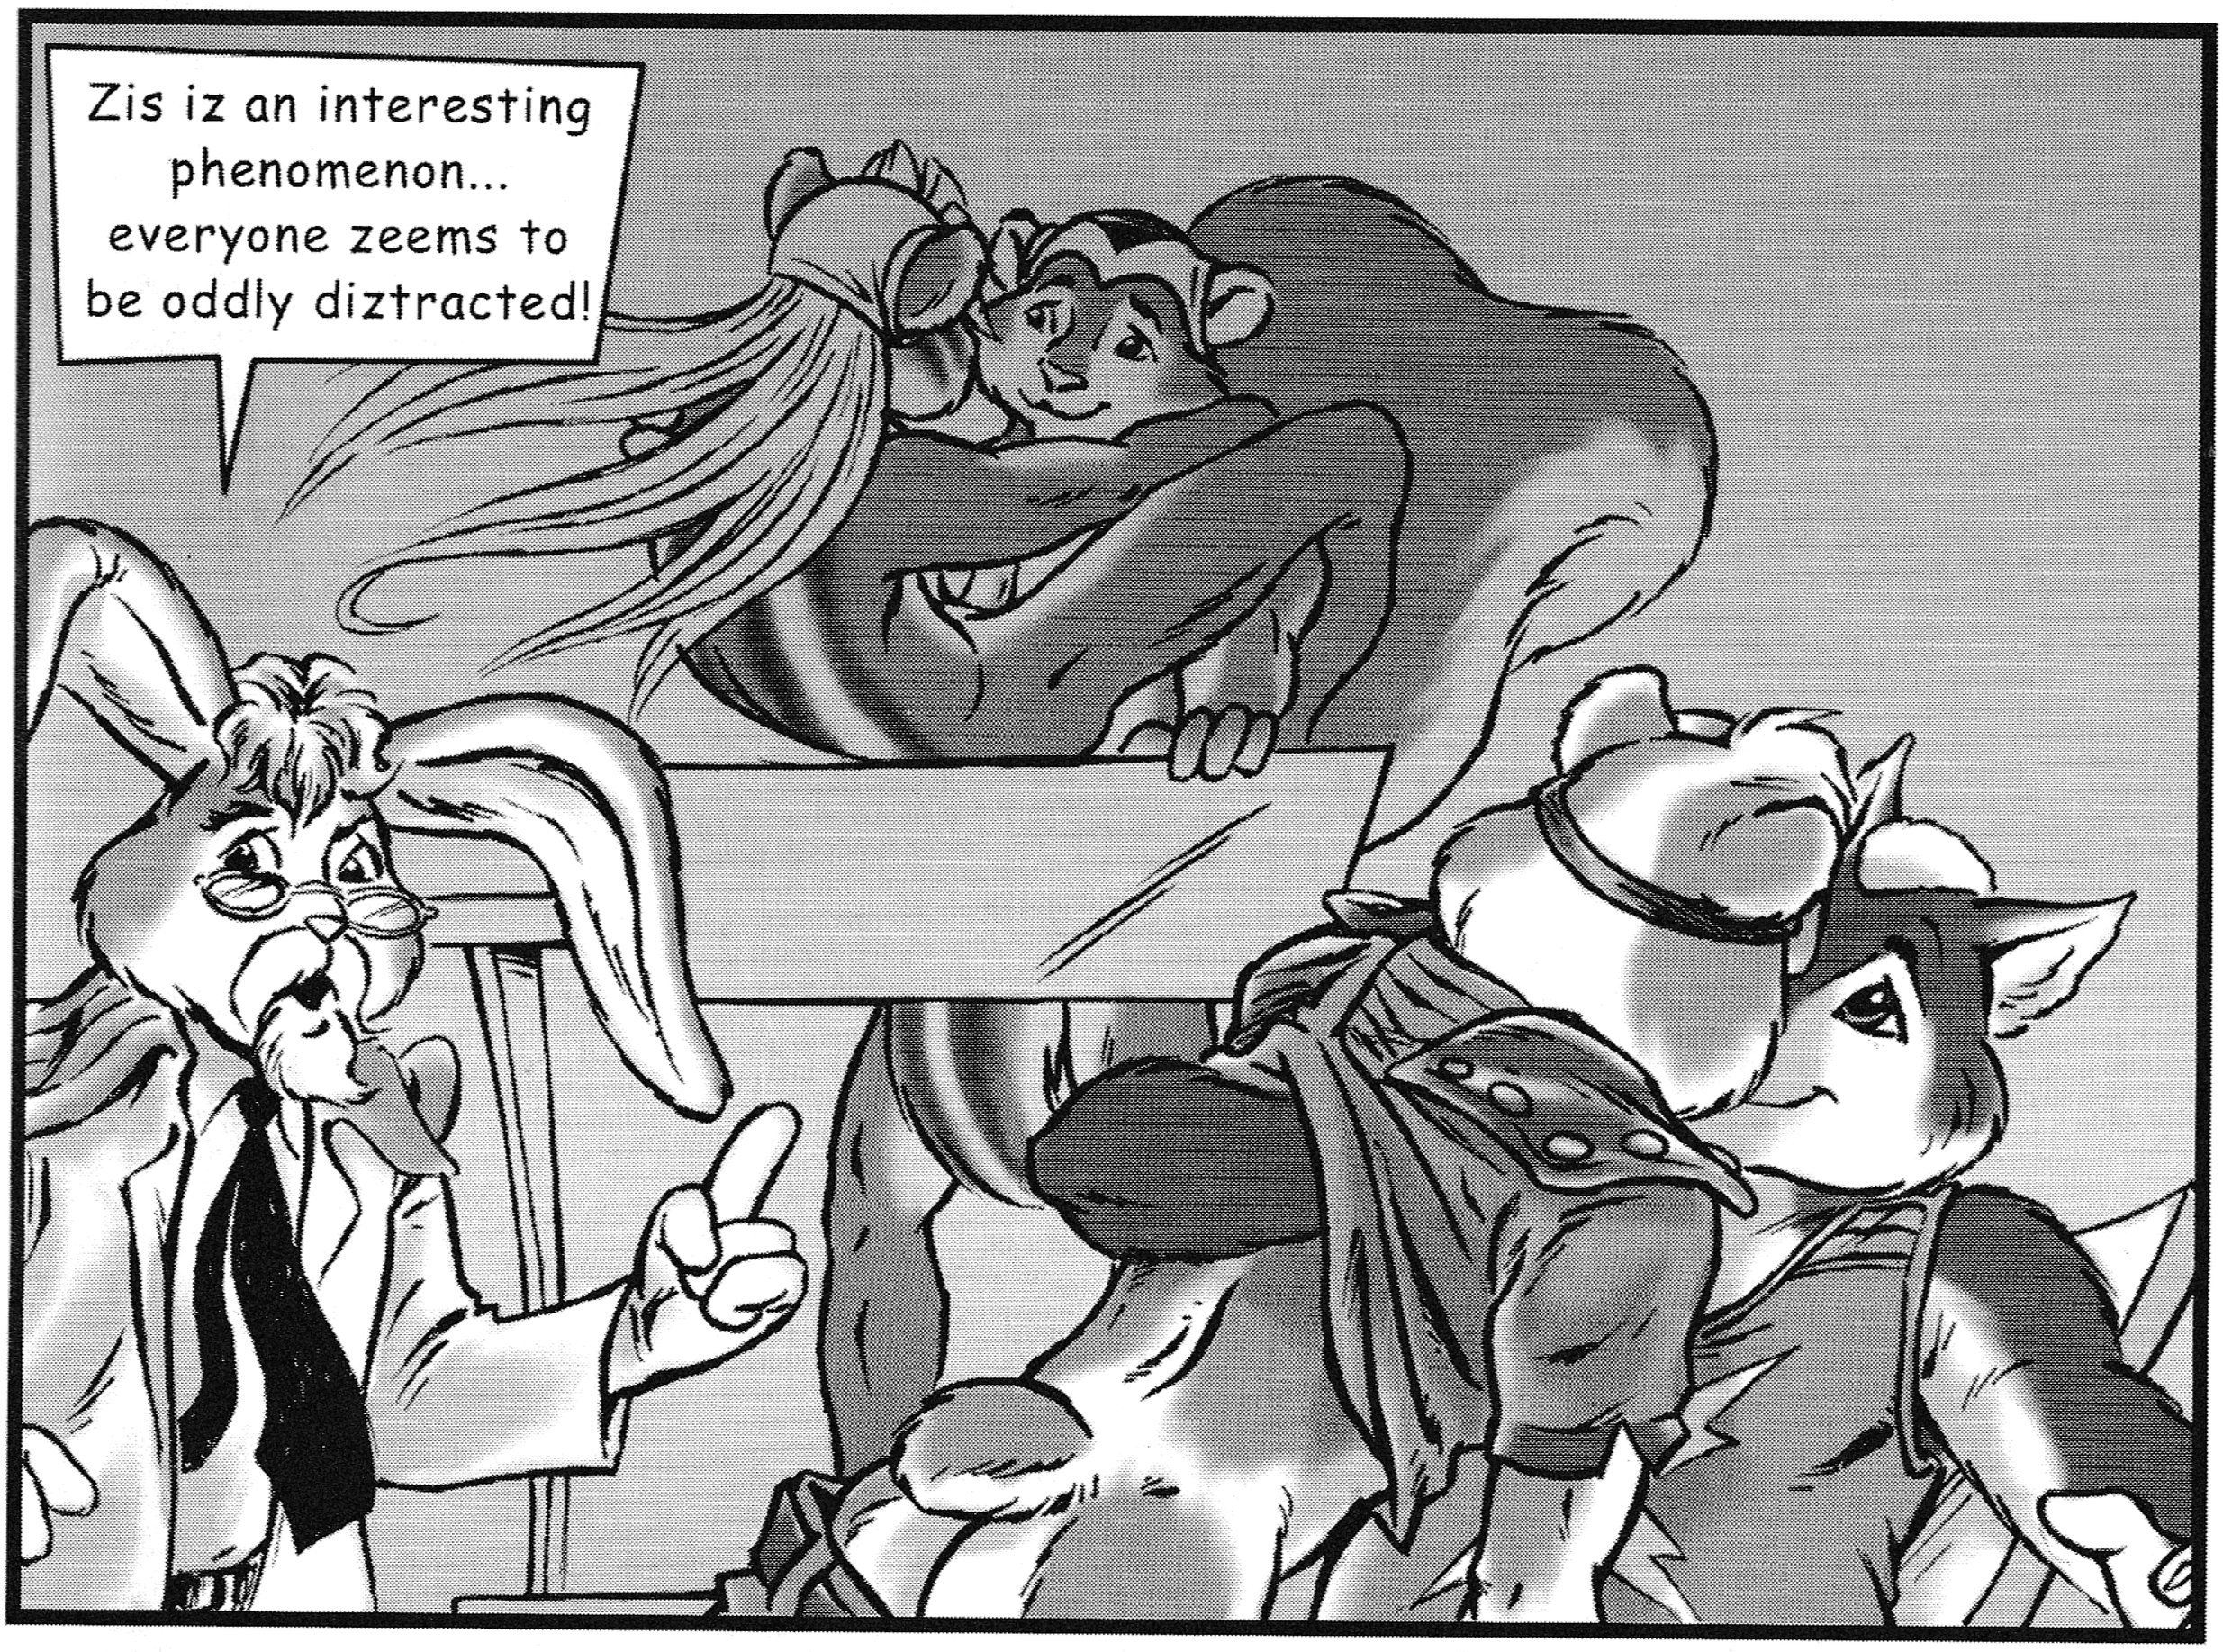

We should've warned ya, Doc. Nova... likes machines!
Yeah, REALLY likes them. I'm surprised he hasn't jumped your robot...

Ahhh...we were wondering why he was all sticky!

Nova! This is NOT the time!

Doc, are the readings still in the green?
Yes Captain, we're all go!
Roger?
Still well in ze zafe range...
Right! Full power, Buck!
Aye!
FULL POWER!
Alright! Doc... Doc? You there?
Uh...yes...the test seems..oohh...successf-ooooh!
EEP!
Uh..Cass?
YES!!! YES!!!!!!

Zis iz an interesting phenomenon... everyone zeems to be oddly diztracted!

"Ze faster ve go... ze yiffier we all zeem to get!"

VERY interesting!

Zat's it! LIBIDO!

Yes, Sir?

Nein--not you zilly person!

CAPTAIN!

Uh...yeah...?

Vell, just LOOK at us! Ve're all so horny, ve can barely control ourselves!!

I recognize ze pattern now! It's ze Libido Wave! Zis engine generates a field zat directly stimulates ze libido! It's a SEX DRIVE!

Huh? Whadya mean...?

Only if you're shy, medically, nein.

Uh-huh...any danger...?

I'll...shut... it...down... Captain...if... you...want... OOOHH!!

That's alright Doc-- no hurry! As you were!

Yes sir!

Oooooohhh!!!

Oooooohhh!!!

Uuuuuhhh!!!!

Aaaahh!

Ooooohh!!!

Yeah!!!

OOOOH!!

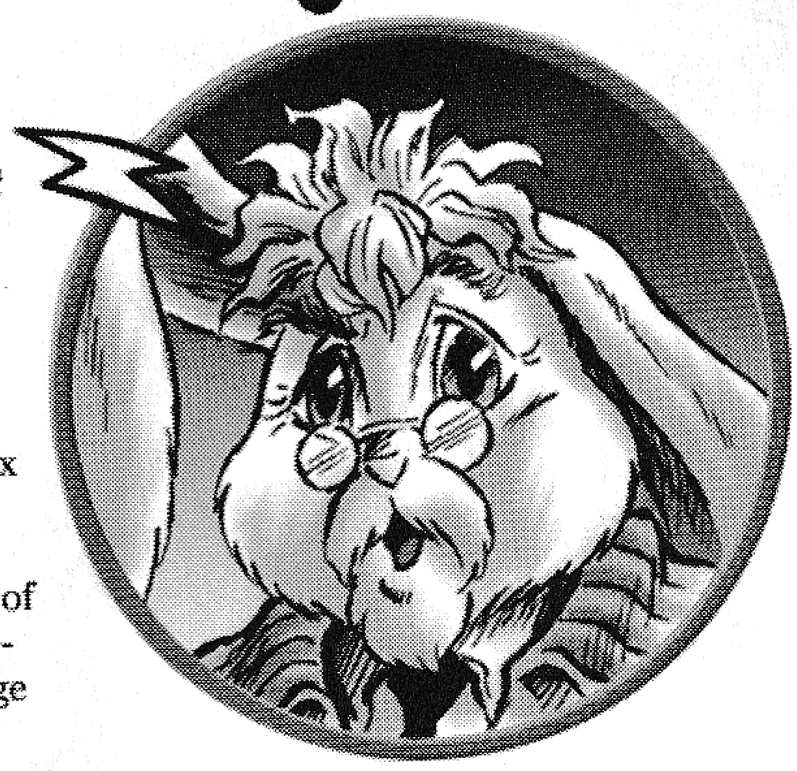

Wow! Let's see what OVERDRIVE is like!

OVERDRIVE

OOOOHHH!!!
UUUUHHH!!!
OOOOHHH!!!
AAAAHHH!!!
The End

And now...

Rocketship Rodents!

ACKNOWLEDGMENTS

TREJAAN & WEREPUPPY

The (Rocketship Rodents) universe started not with a bang but with a giggle.

I remember back in the Fall of 2000, Werepuppy and I were chatting and he said, "I had an idea for a comic book that could be really fun: Spaceship Rodents!" I said it was cute, but it wasn't until he changed the name to Rocketship Rodents that I started to see the possibilities. Over then next day or two, we came up with some basic character ideas (most of whom are in this book... as well as a few that didn't make the cut), always trying to see which of us could make the other laugh the loudest with our horrible puns and double (triple?) entendres.

I quickly put together a LONG and convoluted script that was pretty cute (and needs to be reworked), but it wasn't until Kurst had the idea for what became "Sex Drive" that I knew I had the characters down. There are a few ideas that I need to write up scripts for as well as a couple that are already done... but this was the first REAL RR story.

I need to thank a few people (so you can skip this part if you want to.) ;) First and foremost, I owe it all to Werepuppy for his inspiration and support. He's more than just my partner in crime, he's one of the most improtant people in my life (and a fantastic artist... but you already know that! You can't tell me that you bought this book because I was involved in it.) ;)

Second, Kurst has always been there to help in so many ways that this comic could never have been made without him! We call him the Hyper-yote and he proved worthy of the name with his ceaseless efforts to keep us on schedule and make sure the book got finished.

Smiling Wolf has been one of the biggest supporters of the comic from the beginning. His "obsession" with Cassie really helped me understand what it is about the munk that makes him so appealing. As SW said, "You look at him and you think he's just this twink... but he isn't. He's actually a strong character who likes to take charge!" (and he's a really cute little slut) ;)

Sean Rabbitt has been a wonderful publisher! He's been extremely patient and always seems to know when to press and when to step back and let us work at our own pace. ALOT of the credit for having the book done goes to him!

Kangarooboy (Savior of the Furry Universe) came to our rescue for a spectacular 11th hour save! Our FINAL (drop dead) deadline was fast approaching and Werepup's PC (a steaming pile of a computer at its best) decided it didn't want to work! This was with 20 pages left to finish!!! Kurst had the great idea to call Kangarooboy and ask (since he lives near Der Pup) if he would allow him to borrow his PC (which Kurst had built the year before... so he KNEW it worked!) so he could finish. So, a HUGE thank you to Kangarooboy for his generosity! We couldn't have done it without you!

And (sappy as it always sounds when I read it in other comics) I need to thank each and every person who bought this comic! I really hope you find it to be worth the wait! For my part, I'll see to it that the next issue is even better!

Hugs,
Trejaan - The Black Cave-Lion
